

**WINNEBAGO COUNTY HEALTH DEPARTMENT
JOB DESCRIPTION**

Job Title:	Public Health Nurse I
Center:	Health Promotion and Wellness
Reports to:	HPW Center Director and HPW Supervisor
FLSA Status:	Temporary
Grade Level:	14
Date Created/last reviewed:	August 15, 2018

POSITION SUMMARY

The Public Health Nurse promotes and supports population health in Winnebago County by providing treatment and education, and referral to assigned clients, to optimize health and in support of the core functions and essential services of public health. Nursing activities include, but are not limited to, systematic analysis of current health status, treatment care plans to include influenza vaccination, health education, advocacy, and collaborating with community partners to promote the health of the individual and the population. Public Health Nurses often collaborate and consult within multidisciplinary and multi-agency teams in order to address the social determinants of health and achieve desirable outcomes for families and communities. Public Health Nursing interventions occur at the individual, family, community and system levels, depending upon the responsibilities of the position and the issues involved. The temporary Public Health Nurse 1 responsibility will be to provide influenza vaccinations at various community clinic settings within Winnebago County as scheduled by the Health Promotion and Wellness Center at Winnebago County Health Department. Services are provided during normal business hours and on weekends and evenings as needed.

ESSENTIAL DUTIES AND RESPONSIBILITIES

Leadership and Systems Thinking

- Demonstrates knowledge of applicable state professional practice guidelines for registered professional nurses, the American Nurses' Association *Scope and Standards of Practice for Public Health Nursing* and any other Federal and State laws and regulations applicable to practice as a public health nursing professional.
- Adheres to applicable Occupational Safety and Health Administration (OSHA) standards, such as those concerning exposure to bloodborne pathogens, toxic substances, airborne pathogens or exposure to other hazards during routine assignments or assignments during public health emergencies.
- Collaborates in developing a work environment where continuous quality improvements in practice are pursued.
- Assumes responsibility for own professional growth and development by pursuing continuing education, participating in professional committees and work groups.

Public Health Sciences

- Performs comprehensive individual assessments which include health history, physical assessment, psycho-social assessment, and assessment of basic needs including food, housing, income, resources and supports, and access to health care for the main purpose of immunization.
- Provides care coordination, referral and follow-up to individuals and families who are members of a vulnerable population and/or high-risk groups.
- Uses public health surveillance/disease investigation methods in community outreach, screening, and case finding of communicable and infectious diseases that threaten the health of the community.
- Engages individuals and families in a plan of care that addresses their identified health deficits and issues. Provides education and counseling to individuals, families and community groups that are adapted to their unique needs, lifestyle, cultural and socio-economic situation.
- Obtains and completes appropriate patient "Consent for Care" forms, ensures patient confidentiality and maintains orderly health/medical records. Follows established internal policies and procedures as well as the State and Federal laws that govern the release of health care information.
- Documents patient assessment and intervention data in health medical records. Uses approved established medical record forms and documentation practices.
- Consistent with provisions of the Illinois Nurse Practice Act (225ILCS 65 Nurse Practice Act page 3, Section 50-10 # 6 and # 7), delegates and supervises individuals who assist the registered nurse with implementing the plan of care in a manner consistent with those individuals' job classification or scope of practice as nursing students.
- Responds to individual client emergency situations in the community setting with basic life support and first aid skills. Summons other health care providers and emergency response personnel in a timely and appropriate manner.
- Collaborates in development and delivery of programs and activities for individuals, families and population groups that promote health and prevent disease, in settings including, but not limited to all Health Department buildings/sites, community organizations and businesses, schools, and the community in general.
- Evaluates outcomes of public health nursing interventions; works with others (clients and other professionals) to makes changes as necessary on micro and macro levels
- Participates in response teams to prevent, minimize, and contain adverse health events and conditions resulting from communicable diseases; food-, water-, and vector-borne outbreaks; chronic diseases; environmental hazards; injuries; and health disparities as needed.
- Demonstrates clinical nursing skills focused on immunization.

Community Dimensions of Practice

- Advocates on behalf of vulnerable individuals and populations; participates in assessing and evaluating health care services to ensure that people are informed of available programs and services and are assisted in the utilization of those services.
- Participates in Winnebago County Health Department sanctioned research and demonstration projects that seek to improve the health of communities and determine new ways to address health issues especially those related to public health nursing as needed.
- Contributes to a work environment that fosters ongoing educational experiences regarding public health nursing for colleagues, nursing and other health-related students, healthcare professionals and members of the community.

Analysis and Assessment

- Participates in the analysis of data to identify trends, health problems, environmental health hazards, and social and economic conditions that adversely affect the public's health.

Policy Development and Program Planning

- Coordinates activities among and between other governmental agencies, such as the Illinois Department of Children and Family Services, that enforce laws and regulations that protect the public's health as needed.
- Collaborates in the development of evidence-based public health nursing practices and programs in collaboration with universities, other nursing agencies, businesses, trade associations, other staff and the public as needed.
- Collaborates in and contributes to individual, team, and Departmental quality improvement and evaluation activities.

Communication and Cultural Competency

- Utilizes appropriate methods for interacting effectively and professionally with persons of all ages and from diverse cultural, socioeconomic, educational, racial, and ethnic backgrounds, sexual orientations, lifestyles and physical abilities.
- Adheres to ethical principles and Winnebago County Health Department policy in the collection, maintenance, use, and dissemination of data and information.
- Describes the expression of diversity within Winnebago County and the impact of diversity on policies, programs, services, and health of the community.
- Ensures that the literacy of populations served is reflected in WCHD policies, programs, and services.

Financial Planning and Management

- Assists with financial payment processes as needed during community setting vaccination clinics, adhering to WCHD fiscal policy for handling cash payments.

Other

- Performs public health emergency response duties as assigned and consistent with job classification and training provided, in response to threats to the public's health as needed.
- Participates in Department and community emergency response training and drills consistent with job classification in support of public health emergency and disaster preparedness as needed.
- Performs other duties as assigned consistent with job classification as needed.

BEHAVIOR EXPECTATIONS

- Treats others with courtesy and respect in all interactions.
- Responds with flexibility to changing needs.
- Manages multiple tasks and deadlines.
- Supports and promotes the department's vision, mission, and core values.
- Promotes team and organizational learning

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Work performed in the field is subject to conditions that range from inclement weather to dangerous conditions such as snow/ice, cold, heat, noise, wetness/humidity, vibration, sudden temperature changes, and poor illumination at the job site, or during travel for the job. Travel to and from field locations may subject worker to increased risk of driving hazards. Field location may subject worker to communicable diseases, raw sewage, immobilizing mud, food service equipment, vectors (i.e. mosquitos and ticks), fleas and chiggers, pathogens, snakes and poison ivy, if working within the capacity of emergency preparedness. Clinic conditions are similar to a typical office environment. The employee is exposed to noise from close working conditions and significant work pace/pressures.

Blood borne Pathogen Risk Code: None __ Low __ Medium __ High X

The above is intended to describe the general content of and requirements of the performance of this position. It is not construed as an exhaustive statement of duties, responsibilities, or requirements.

I acknowledge that I have read the entire job description, and understand and agree with its content.
